EXPERIENCE

Compire — Frontend Developer

October 2018 — December 2021

Compire is a US-based software development agency focused on creating sleek and premium user interfaces. I was responsible for building hyper-interactive applications where users could collaborate in real-time, have video calls, rotate materials, etc.

Lix Technologies — Frontend Developer

May 2020 — July 2020

I worked with a Danish startup as a frontend developer, creating an interactive application using React.js. I implemented new features using Firebase cloud functions, Express.js, SendGrid, and other technologies.

Plan2learn — Frontend Developer

October 2019 — May 2020

ProOffice is a medium-sized Danish corporation that has developed its own e-learning platform. My work at ProOffice included working on their e-learning platform and contributing to creating their design system based on the Material-UI library and its best practices.

Planable — React Native Developer

January 2019 — August 2019

Planable is an innovative start-up, trusted by marketers to plan, collaborate, approve, and schedule their social media content. My work at Planable included developing and implementing new features for their cross-platform mobile application (available on App Store & Google Play) using React Native, and occasionally working on their web application using Meteor.js.

Idea Advertising — Frontend Developer

February 2017 — October 2018

I helped Idea Design, a Romania-based mid-sized corporation, build the "Professional Service" application, using JQuery, React, and React Native.

VIA University, Denmark — *Bachelor in Software Engineering*

August 2019 - January 2023

PROJECTS

Material Bank

Material Bank is an American technology and logistics company headquartered in Boca Raton, Florida. The company provides a platform for searching and ordering free samples of architectural, construction, and design materials.

[Material Bank](#)

Scope Tickets

Scope Tickets is an online ticketing vendor for operators within the live music and events space. The company designs highly customizable, white-label ticketing portals which allow event organizers to sell tickets and showcase their brands & performing artists in a much more nuanced way, not traditionally seen in existing ticketing softwares.

Luxury Presence

Luxury Presence is a VC-funded Stanford StartX-accelerated startup, building a premium platform to provide real estate agents with stunning websites, world-class marketing tools and services, and access to an exclusive network. Their customers are often found on the Wall Street Journal and Forbes top 100 real estate lists and includes leading agents and brokers like Compass, Coldwell Banker, re/max, Sotheby's international realty, and many more

[Case Study](#)

Jamrynn

Jamrynn is a web chat application that connects coaches with their sports teams. The web app has a unique chat environment for sports teams where they can set specific goals, create workouts, communicate among themselves, and keep in touch. Moreover, the web app would link coaches to teams, allowing them to chat and recruit new members.
